**Introduction: The Problem
& Solution**

The Microloan Gap

Lack of Access for Small Borrowers

Many individuals and small business owners are excluded from traditional lending due to a non-existent or limited credit history, thus facing obstacles in accessing microloans.

Lengthy Approval Processes

Traditional banks have lengthy approval processes that make it difficult for people in urgent need of funds to get access to the required microloans.

Insufficient Investment Guidance

Individuals, especially those with limited financial knowledge, often lack guidance on how to manage their money and make informed investment decisions.

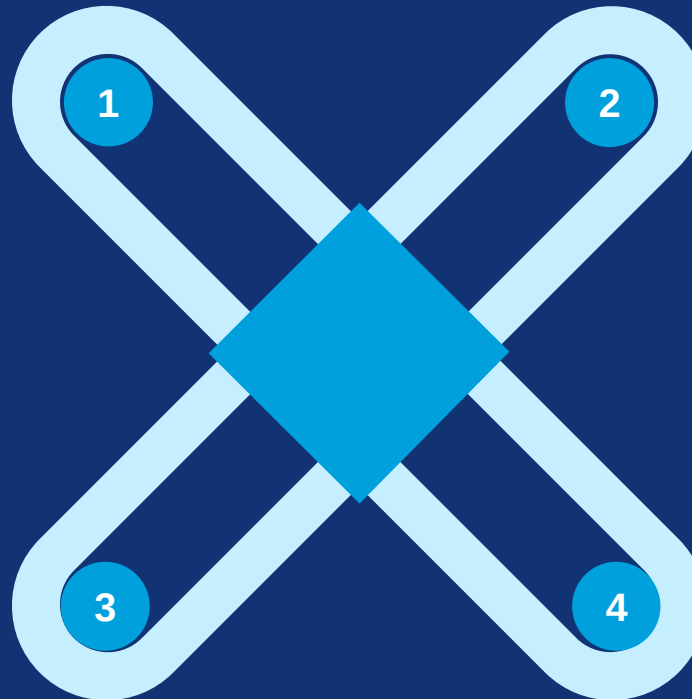

AI-Driven App Solution

Instant Loan Access

Our AI-powered app will provide quick, small-scale loans to individuals and business owners, streamlining the process for fast access to urgent capital when cash is short.

AI Investment Advisory

The app will offer AI-powered investment advisory services, providing users with personalized recommendations of stocks, bonds, and mutual funds to help them grow their wealth.

Automated Credit Scoring

Our app will utilize AI algorithms to automate credit scoring, enabling faster and more efficient loan approvals based on comprehensive data analysis.

Fraud Detection

Implementing algorithms will help detect unauthorized account activity, enabling prevention of losses and ensuring integrity of transactions for users.

•02

**Market Need &
Competitive Advantage**

Target Audience

Small Business Owners

The app targets small business owners who need quick access to funds for inventory, expansion, or operational expenses and often struggle with traditional loan processes

Gig Workers & Students

Gig workers and students are perfect user base because these individuals often face income volatility and require flexible, small-scale borrowing options, coupled with investment tools.

Individuals with Irregular Income

The platform seeks to become the go-to one-stop shop for individuals earning irregular income and require flexible, small-value loans supported by reliable and accessible financial advice.

Market Demand & Competitive Edge

01

Rising Need for Small Loans

As living costs increase and financial needs become more unpredictable, the demand for fast, small-value loans rises, creating a substantial market opportunity.

02

AI-Driven Risk Assessment

Using AI and ML for risk assessment of borrowers will ensure the platform can accurately assess and address the risks associated with small-scale lending.

03

Personalized Loan Limits

AI can identify the best loan limits tailored to each person that reflects their ability to repay, thus avoiding financial strain and defaults, creating win-win scenario.

•03

App Features &
Functionality

AI

User Registration and Loan Details

01

KYC Requirements: Aadhar/PAN/Account

For secure verification and compliance, users must register using their Aadhar, PAN, and a verification linked current account to access the apps function and capabilities.

02

Loan Range: ₹100 to ₹40,000

The application allows loan withdrawals available in the range of ₹100 to ₹40,000 to suit a variety of immediate financial needs to a broad base of customers.

03

Round-Figure Withdrawals

To simplify user experience, withdrawals can be processed in round figures, to promote effective management of funds and accounting.

AI-Powered Credit & Investment

AI Credit Scoring Model

Eligibility for loans is determined using an AI-based credit scoring model that assesses risk factors and payment history, and providing personalized loan options to users.

01

02

Dynamic Interest Rates (ML)

If there is a delayed interest rate, the platform uses an increasing ML-based rate that makes it more costly to delay or default, but also protects the platform's sustainability.

03

Gullak Savings/Investment

Users can save money in a dedicated Gullak savings account, offering a goal-oriented way to accumulate funds, with high-interest rates paid to encourage better saving habits.

04

AI Investment Suggestions

Providing intelligent market insights helps to ensure investment opportunities in the market and provide the user with insights to build their understanding of the market.

•04

Benchmarking &
Competitive Analysis

AI

Feature Comparison Table

01

Loan Approval Time Comparison

Traditional banks take 2-7 days for approval, existing loan apps take 24-48 hours, while our app provides instant AI-driven decisions.

02

Interest Rate Models

Traditional banks and existing loan apps offer fixed interest rates, whereas, this app provides dynamic AI-based rates.

03

Credit Assessment Techniques

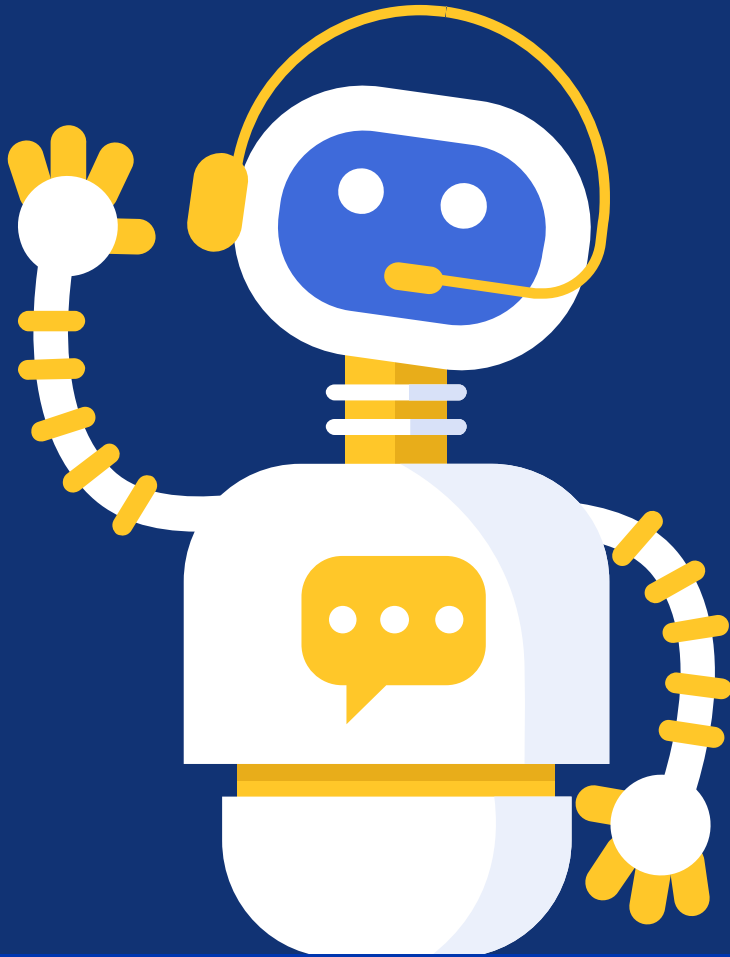

Traditional banks use traditional CIBIL scores, existing loan apps use CIBIL + user history, but our app offers AI/ML-based risk profiling.

04

Investment Advisory Services

Traditional banks offer none, existing loan apps provide basic savings accounts, while our app gives AI-powered investment insights.

Our App's Unique Selling Points

1

Instant AI Decision Making

Leveraging AI, the app guarantees instant loan decision-making, which sets us apart from apps that could take an average of 24 hours to deliver their decision.

2

Dynamic ML-Based Rates

By implementing AI, rates are more in line with the market, and this dynamic adaptation ensures that fair pricing reflects the real-time risk of the current customer set.

3

AI-Powered Investment Insights

Through this app, users gain access to smart and AI-driven insights into market investment, including high-return opportunities and high-performing stocks.

•05

**Business Model &
Monetization**

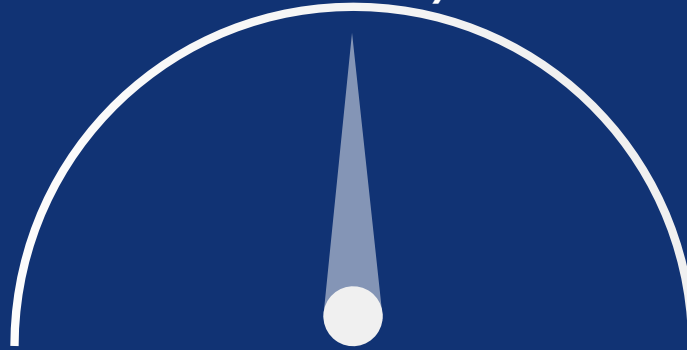

Revenue Streams

Loan Interest (20%+)

It will produce revenue through interest collected from loans at 20% at the base rate; then, it will increase for late payments, adding to its net profit.

Penalty Charges (Dynamic Increase)

Dynamic penalty charges are introduced for late payments that will create an incentive to encourage timely repayments.

Investment Commission (10% Gullak)

A fixed 10% commission for all profits produced by recommendations for Gullak investment, explicitly within the stock market, ensuring more revenue.

Unique Value Proposition

Lower Minimum Withdrawal (₹100)

Unlike other apps with a minimum withdrawal of ₹500-₹1000, our app allows withdrawals starting from ₹100, making it more accessible.

Opportunity to Repay

The app provides an extra opportunity to repay the money, as users can pay the due amount after getting one extra week to pay interest from the app.

Integrated Investment Concept

Our app offers an integrated investment concept for the stock market, something that other loan apps do not offer. It is guided by professional analysts.

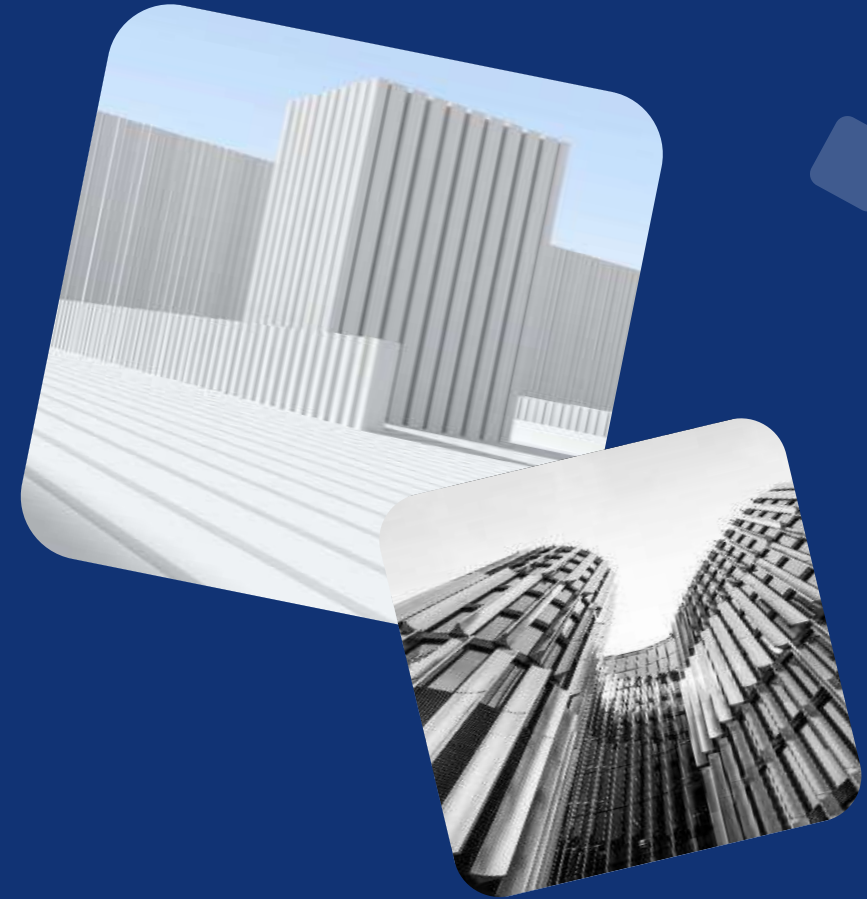

Analyst-Guided Stock Market

Providing analyst trends in the stock market to ensure the best and most profitable investment opportunities for the user, making our app unique.

Premium features

Subscription-Based Financial Advisory

Provide advanced financial advisory services to advanced users for better knowledge and insights.

•06

Risks, Regulations & The
Future

Legal and Regulatory Compliance

01

RBI Guidelines on Digital Lending and Credit Scoring

Adherence to RBI guidelines ensures that the app complies with regulations, building trust among customers.

02

KYC

Full KYC compliance for all financial transactions protects the platform and users against fraud.

03

Stock Market Investment Rules

Following stock market rules for retail users further ensures the safety and security of stock market activity on the platform.

Applicable Constraints

Data Security (GDPR/IT Act)

To ensure user data protection, our app adheres to GDPR (where applicable) and the Information Technology Act in India.

01

02

Expertise/Budget

To overcome this issue, we plan to hire experienced ML/AI engineers, financial experts, and legal consultants, which also affects our budget greatly

Future Development

01

Further AI Model Refinement

Refine and improve AI credit scoring models through ongoing data analysis and incorporate user feedback.

02

Integration with More Financial Instruments

Plan integration with new and broader financial instruments in the future to increase market share, and product offerings.

03

Expansion into New Markets

Once established on the market, the platform aims to start expanding strategically into new markets to deliver responsible financial practices to a larger audience.

THANK YOU
